Assistant Commissioner for Patents  
Washington, D.C. 20231

Dear Sir:

The following is being submitted in response to the Restriction Requirement mailed June 5, 2002.

**ELECTION OF INVENTION TO BE EXAMINED**

A In response to the Restriction Requirement dated June 5, 2002, Applicant respectfully traverses the restriction requirement on the basis that the distinctions set forth as the reasons necessitating restriction may not be patentable distinctions. Nonetheless, in response to the restriction requirement, Applicant hereby elects, without prejudice, Group I, claims 1-24. Accordingly, Applicant, in the event the traversal is unsuccessful, has herein canceled the non-elected claims 25-74 from the subject application.

Applicant traverses the rejection that claims 25 and 26 are patentably distinct from claims 1-24. Claims 25 and 25 are preferred embodiments of the invention claimed more broadly in Claims 1-24. Searches of prior art for the invention described in claims 1-24, would also be applicable to the specific embodiments claimed in claims 25 and 26.

The Examiner is requiring Applicant to elect a single disclosed species of stabilizers for prosecution on the merits to which the claims shall be restricted if no generic claim

is finally held to be allowable. Therefore, Applicant elects PVM/MA Decadiene crosspolymers as a species of stabilizers. Claims 2, 10-13, and 15-26 are readable on the elected species of stabilizer, PVM/MA Decadiene crosspolymer.

The Examiner is also requiring Applicant to elect a single disclosed species of active. Therefore, Applicant elects a mixture of spinosyn A and spinosyn D as a species of actives. Claims 1-26 are readable on the elected species of active, a mixture of spinosyn A and spinosyn D.

An early and favorable action on the present application is earnestly solicited.
